# Notice de montage

Imprimer les bandes numériques sur du papier ordinaire et les bandes servant à la construction du rouleau sur du papier cartonné.

Découper les bandes numériques (en conservant les marges basses).

Découper la bande servant à former le rouleau ainsi que la bande d'enroulage.

Construire le rouleau en collant la languette sur l'envers du carton.

Plier les extrémités de la bande d'enroulage. L'insérer à l'intérieur du rouleau formé puis coller les extrémités entre elles.

Assembler toutes les bandes numériques et les coller sur la partie mobile du rouleau. (les bandes sont un peu moins larges que le rouleau pour faciliter l'enroulement.)

Languette à replier et à coller sur le trait.

Coller la languette sur le trait.

Coller ici les bandes assemblées, en laissant  
une marge de 2 à 3 mm sur les côtés.
